COLOR COMPARISON TABLE

BEAM ANGLE COMPARISON TABLE

CRI COMPARISON

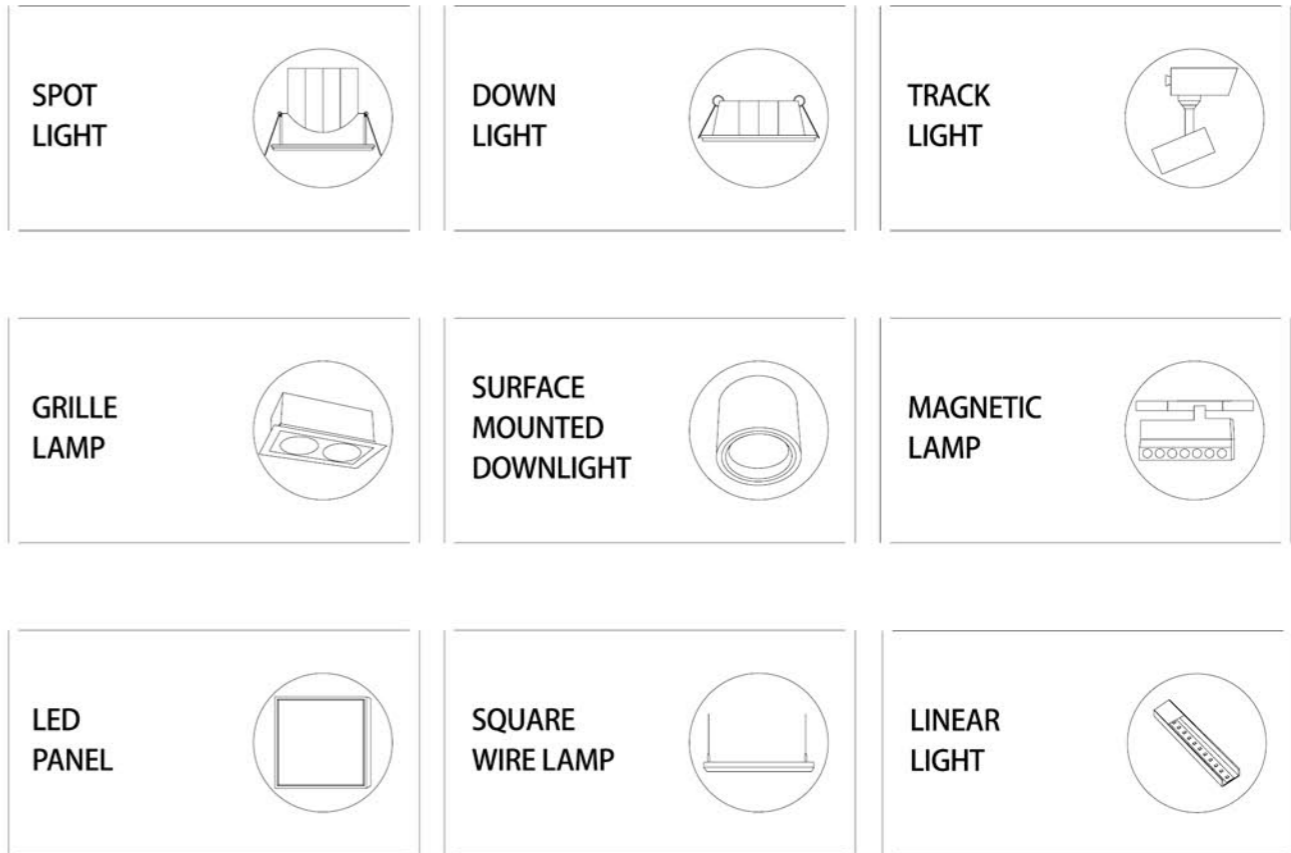

The larger the RA, the better the color rendering performance; on the contrary, the worse the color rendering performance. The color rendering index of sunlight is defined as 100.

ROPE TRACK

In the lighting design, based on the use of traditional lines and tracks, get rid of the constraints in space design, expand the thinking of lighting designers to achieve unrestrained lighting display. This is not only the effect of the lighting display, but also the brush of the lighting designer for the space lighting design, which is a set of flexible artworks!

ROPE TRACK

Points, lines and surfaces that shuttle freely in space lighting design.

ROPE TRACK

According to the different needs of space lighting design, flexible application of fulcrum and lamps to achieve the ideal lighting enjoyment.

LIGHT

ULTRA THIN LINEAR TRACK
ROPE TRACK

ROPE TRACK

It Take space lighting to another level

In the process of lighting design, braided track design provides a powerful role for imagining fantasies. Combine multiple luminaire lighting to place lighting effects more precisely where they are needed, creating more visual layers in any space.

ROPE TRACK

There are exclusive fittings that combine to make straight track lamps available for rope track

An extension of the braided track can be obtained by placing a fulcrum on each position where the track is pulled.

The fulcrum has a variety of installation methods, can be installed on the ceiling, can also be installed on the aluminum rail, can be used as a power fulcrum, that is, can be used as an expansion fulcrum, not subject to environmental restrictions.
